

## Connected Solutions

### Ideation & Planning

### Design & MVP Development

### Launch & Deployment

### Managed Services & Continued Innovation

#### **Faster deployment, rapid adoption.**

Leverage our proven architectures to quickly develop connected solutions and innovate your offering with new functionality.

#### **Connected solution experts.**

Simply bring your ideas to our team and we will execute your vision in a secure, compliant, world-class solution built just for you.

#### **Flexible architecture.**

Leverage best of breed technology on GCP to empower your entire organization to utilize the data from a connected factory.

**ClearObject** is an IoT solutions integrator, partnering with some of the world's best companies across every vertical to adapt their offerings for the data driven economy.

Our team of experts work to develop a Connected Solution for your organization, creating a "data product" that compliments and enhances your current offering. Our Connected Solution offerings help you realize the full potential through the monetization of your existing data and/or the creation of new data streams.

**ClearObject** has the ability to monitor, build and iterate upon cohesive IoT solutions, ensuring an uninterrupted customer experience while offering:

- App development and management
- Asset management integrations
- Custom alerts and reporting
- Custom dashboards
- Machine Learning model development/training
- Predictive analytics
- Data ingestion
- Data lake development

Our measured approach and methodology help launch a digital product that compliments your existing product portfolio, while enabling you to bring enhanced services to the marketplace without the burden of managing the complex intricacies of the platform.

**ClearObject's** Connected Solutions are built and deployed on Google Cloud Platform (GCP), leveraging both the **ClearObject** team and the experts at Google. Google Cloud's world class machine learning and analytics systems enhance your overall solution, ensuring you get the most out of your data.

## Solution Stories

ClearObject works across multiple verticals to deliver innovative solutions to some of the world's best companies.

### Automotive

Our team worked to improve overall product quality by providing internal engineering teams with live field data, better informing their new product development.

### Industrial Manufacturing

ClearObject was able to drive innovative product design for smart home products by analyzing customer usage patterns and optimizing the user interface experience in real time.

### Operations and Distribution

ClearObject helped a customer increase their operational profitability by enabling delivery and logistics optimization through IoT activation.

### Housing Development

Our ability to publish usage and consumption patterns of residents allowed developers to incentivize energy efficient tenants with additional services and reduced cost of services.

---

**Because the Internet of Things is simply the networking of various devices, any and every industry, company, and object can become part of this revolution.**

- Automotive
- Energy
- Manufacturing /Supply Chain
- Housing Development
- Food Services
- Operations/Distribution
