

ClearObject enables innovation by bridging the gap between a customer and their preferred platform with custom solutions and continued management.

Our Connected Solutions will integrate with the platform of your choosing, allowing you to incorporate existing technology into a new solution that is designed to monetize the data your current process, product, or organization is already producing. We develop our solutions on Google Cloud Platform.

Opportunity

Our customer wanted to leverage data from the field to better understand how their new tire pressure monitoring system was operating in the field.

Hypothesis

This would allow them to better predict performance, refine engineering processes and ultimately build a better product.

Solution

Turn-key custom solution streaming data from multiple TSP device clouds, providing real-time visibility into connected assets.

ClearObject has the ability to monitor, build and iterate upon cohesive IoT solutions, ensuring an uninterrupted customer experience:

- App development and management
- Asset management integrations
- Custom alerts and reporting
- Custom dashboards
- Machine Learning model development/training
- Predictive analytics
- Data ingestion
- Data lake development
